EXCEED THE EXTRAORDINARY

BAIC X55 II

X55 II PERFORMANCE

1.5T Engine

The X55's engine is equipped with a Core 1.5 T Turbocharger (VGT) engine with an impressive thermal efficiency of 39.2%, ensuring optimal performance and fuel economy and providing a dynamic driving experience.

4 Different Driving modes

It has four driving modes, ECO for improved fuel efficiency, Sport for powerful performance and quick acceleration, Comfort for driving comfort, and Smart to provide a balance between efficiency and dynamism based on driver behavior and conditions.

7DCT TRANSMISSION

The X55's high-performance transmission is designed for power and efficiency, featuring a 7-speed dual-clutch transmission whose DCT 380 technology allows for lightning-fast gear changes, delivering superior acceleration and improved fuel efficiency.

EXTERIOR

The X55 II has a sleek, futuristic design that captures the imagination. Its soft curves and flowing lines create a sense of movement even when the car is stationary. The X55 II's color transition is smooth, with shades blending into each other in a smooth and harmonious way that gives depth to its exterior.

The X55 car has a very low drag coefficient of 0.32, meaning it is designed to minimize air resistance and enhance speed and fuel efficiency, with a front grille that also has a low drag coefficient.

Crystal Star Design Grille

Sleek front grille and modern design with a crystal like appearance made of Rust-resistant and strong mechanical properties chrome material.

Pop-up Door Handles

The X55 features an automatic pop-up feature for the door handles, which gives a unique and modern experience to the user, as well as reduces the lateral air drag coefficient, which improves fuel consumption. When the person leaves the car, the car automatically closes the handle and locks the car. It also features an ice-breaking mode feature, where if the handle freezes due to rain or snow, the electric lock automatically activates three strokes to break the ice and ensure the car can be used with ease.

Panoramic Sunroof

The X55 panoramic sunroof offers an automatic sunroof closure function during rainy weather while experiencing a well-lit interior.

Split Spoiler

The Split spoiler of the X55 car is designed in a sporty and unique design that makes the car look more attractive and provides efficient performance. The spoiler is designed in a split shape to improve aerodynamic performance and eliminate turbulence excellently, making driving at high speeds more stable and consistent.

Automatic Tailgate

The X55's tailgate features hands-free door opening technology, allowing you to easily enter the car using automatic door unlocking technology when the key is near the car for up to 5 seconds.

INTERIOR

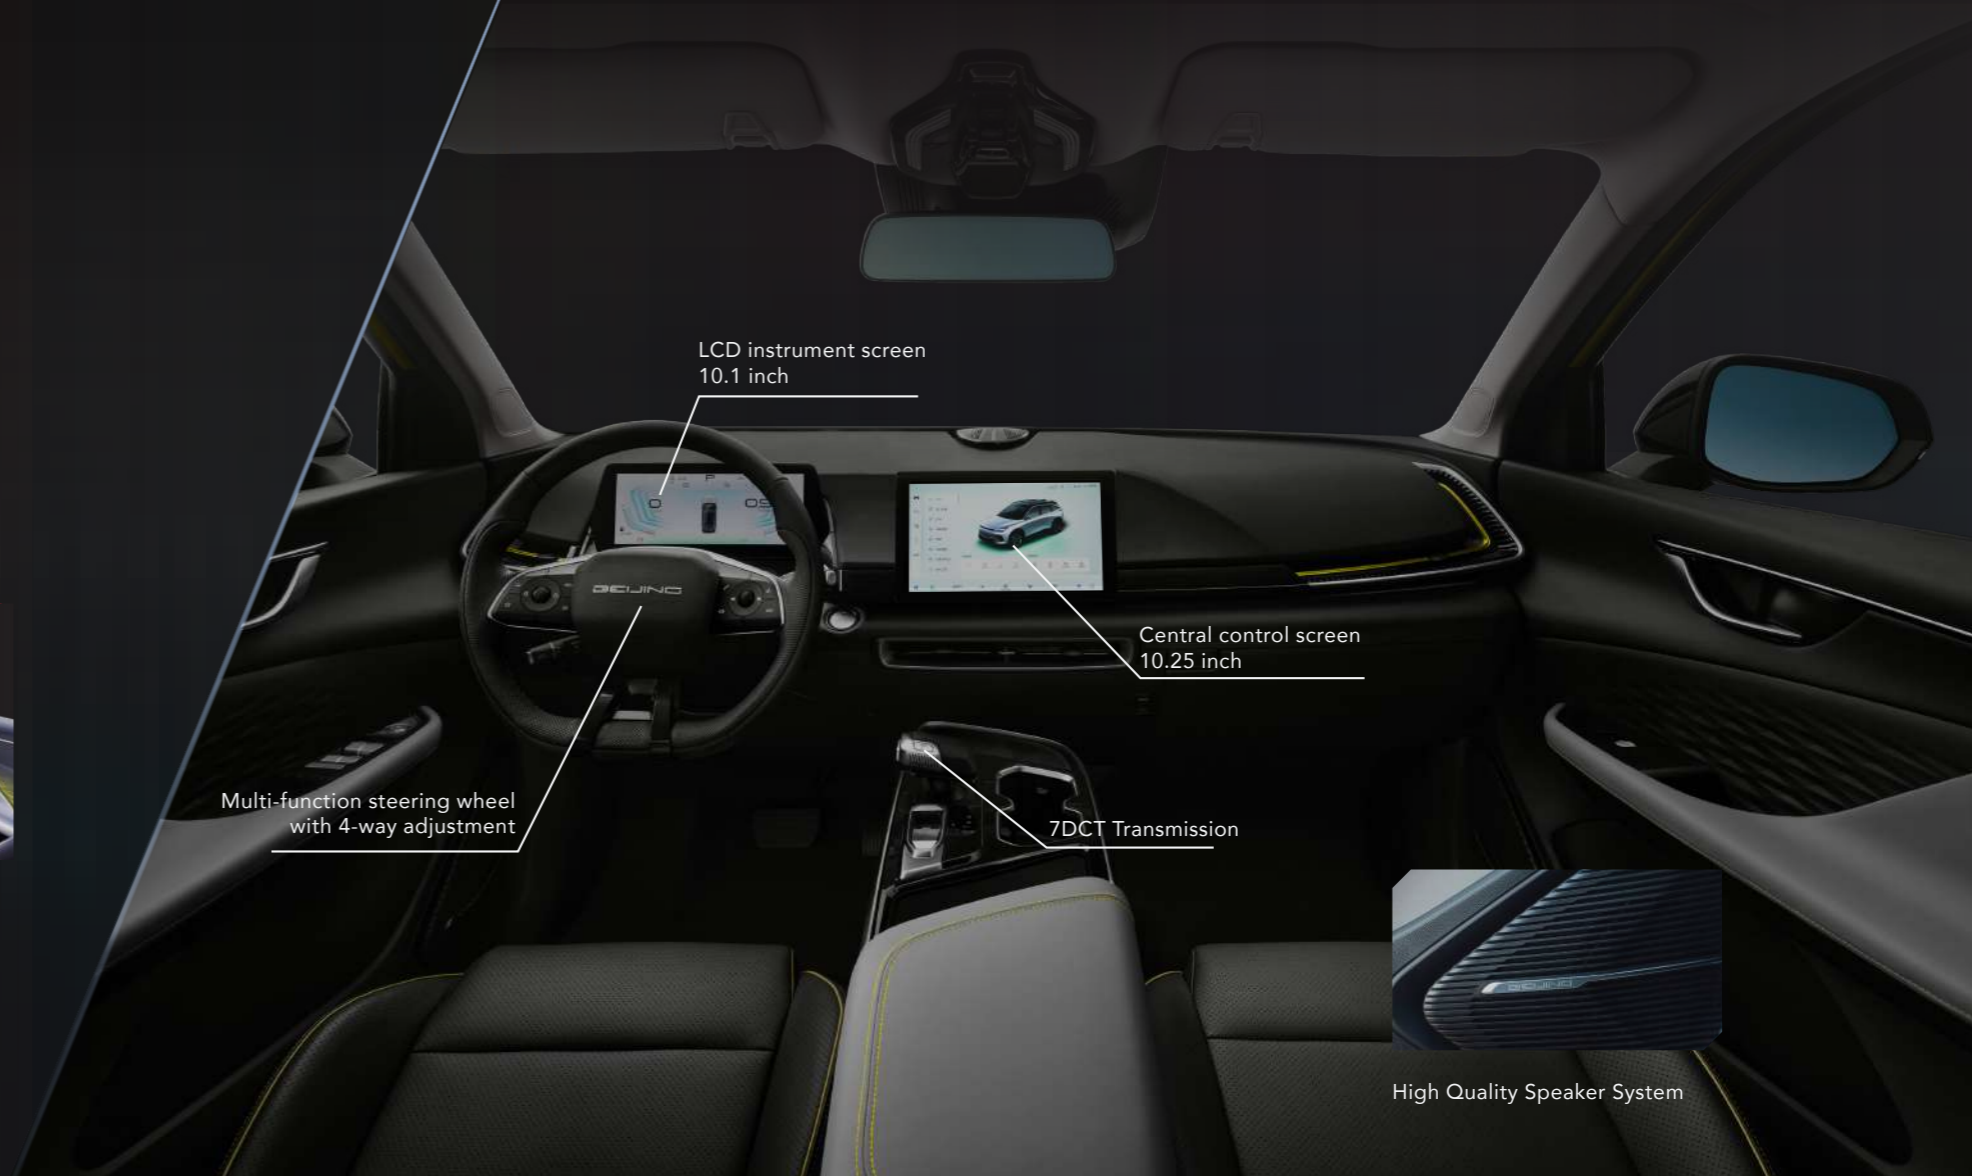

Step inside the new Baic X55 and you'll be greeted with a showcase of cutting-edge technology and luxurious materials, providing a level of comfort and sophistication fit for royalty. Take a closer look at all the incredible features that the BAIC X55 has to offer.

Luxurious material

Ambient lights control

Front seat ventilation

LCD instrument screen

FEATURES

The Baic X55 combines safety and technology in a smooth way, and its automatic parking system helps you park the car easily and conveniently, creating a smooth and stress-free driving experience. In addition to giving it a comprehensive view around the car, which ensures peace of mind and safety while driving. Discover a new level of comfort and safety with the Baic X55

360° panoramic image

(APA) One-button full view automatic parking assist

SAFETY

Vehicle body rigidity could reach 21872Nm/deg, Strengthen safety protection in crash reduction and deformation.

Front and Rear Radar
It features an accurate front and rear sensor system. The sensors provide immediate alerts when the car approaches obstacles, which contributes to avoiding collisions and facilitates parking and maneuvering safely in tight spaces

ACC adaptive cruise control
Intelligent cruise control can be operated during long-distance driving, convenient assistance in low-speed traffic congestion

AEB automatic emergency braking
The autonomous emergency braking system allows vehicles, passengers and bicycles to be identified and sends a signal to the vehicle's braking system to intervene if necessary.

Specification X55 II

Model/Configuration	LV2	LV3	LV4
Body			
Drive type	FF	FF	FF
Engine		1.5TD	
Transmission		7DCT
