

X7 Specification	7DCT Engine with a 1.5 liters		
	Basic parameters	Elite 4iS	Hero 4iS
Length/width/height (mm)	4710/1862/1745		
Ground clearance (mm)	200		
Curb weight (kg)	1665		
Seats	5		
Fuel tank (L)	60		
Luggage volume (L)	450		
Displacement (ml)	1.5 T		
Turnaround	180°P		
Max torque (Nm/kgm)	275/1500-4000		
Transmission	7DCT		
Fuel type	91		
Emission	Euro VI		
Drive type	FWD		
Front/rear suspension	MacPherson type/Risk-link type		
Front/rear brake	Disk/Disk		
Tyre	205/55 R19		
<b>Manipulation &amp; Safety</b>			
Drive mode	outdoor

*I ECONOMIC*

## THOUGHTFUL DESIGN

Extra-wide body  
2800mm ultra-large wheel base,  
which is ahead of that in cars of the same class Widest  
body of the same class

The trunk is connected with the rear seat area to form an even space (nearly 180°), which makes it easier to put in large-sized items; there is no bulge in the central floor in the rear seat area, realizing a qualitative leap in the riding comfort for the passengers sitting in the middle of the rear seat.

2800mm

## THOUGHTFUL DESIGN

### CORNERING LAMP

It can be lighted automatically when turning the steering wheel. It increases the scope of side lighting and narrows the blind zone of vision.

### UMBRELLA STORAGE GROOVE

A special storage location, where the umbrella won't wet other items; two rainwater diversion troughs lead water directly out of the car.

### HIDDEN INTELLIGENT SENSING DOORKNOB AUTOMATIC POP-UP UPON UNLOCKING

The hidden external doorknob of the same shape as Tesla Model S, with the connected double-clasp design that's stable in form and features a stronger anti-pulling strength than the single-clasp design of Tesla.

### STANDARD CONFIGURATION FOR THE WHOLE PRODUCT LINE

Double temperature zone air-conditioners with the air quality management system, which is your loyal air quality guard with precise sensing of air quality, control over internal and external circulation and prevention against pollution.

## DRIVEN BY TECHNOLOGY

### THREE-SCREEN LINKAGE FOR ENTERTAINMENT EXCLUSIVE TO THE FRONT PASSENGER SEAT

The X7 central control system shares the design of Benz, and is even more advanced than the double-screen linkage of Benz Class E.

### REMOTE CONTROL

The car owner can remotely control the infotainment system, lock/unlock doors, start/stop the engine, switch on/off air-conditioners and open/close windows through the APP to be connected with the car at any time and any place.

### PANORAMA IMAGES

360° 3D panorama images are enabled by 4 megapixel high-definition cameras that collect images around the car; car reversing images and trajectory are provided when reversing the car to assist precise parking.

## SAFETY GUARANTEE

### LDW LANE DEPARTURE WARNING

The system identifies the marker lines of the lane where the car is running through the front-view camera, and calculates the car's location relative to the lane. When the driver is unaware of diverging from the lane, the system will give an alert to remind the driver of that.

### 360° 3D SURROUND VIEW

A high-resolution 3D monitoring system that generates a virtual 360-degree view, so that the information is displayed on the screen inside the car, allowing the driver to stop and move the car.

### DOOR OPENING WARNING (DOW)

The moving objects on both sides of the car will be detected when the door is opened after the car reaches the destination. If an objective approaches, the yellow warning light on the external rearview mirror will flash; if the door is still opened, the car will give a sound alert, which will not stop until the risk is eliminated to ensure safe door opening.

### DYNAMIC IDENTIFICATION OF LOW-SPEED OBJECTS

Objects moving at a low speed within 10 m of the car can be effectively identified; both the buzzer and the UI of the infotainment system will warn the driver against accidents (when the speed is lower than 10 km/h).

### AUTOMATIC WINDOW CLOSING IN RAINY DAYS

When car windows are not closed while the car engine is stopped and four doors are closed, if the system detects it's raining or it's going to rain in 24 hours, both the windows and skylight will be closed automatically to protect the objects inside the car from being damaged.

### AUTOMATIC PARK ASSIST (APA)

The blinking frequency and head turning angle of the driver are monitored through the camera in the car, which monitors the driver's state all the time and gives image and harsh sound alerts when the driver is in not in a good state.
